EMIRIUM

Project Overview

Executive Summary & Positioning

Emirium (EMI) is an independent fixed-supply digital asset built on BNB Smart Chain.

The total supply is permanently fixed at **10,000,000,000 EMI**.

Emirium is designed around transparency, disciplined allocation, liquidity readiness, ecosystem growth, and long-term governance.

Emirium **does not** position itself as a government-backed or state-backed asset.

This whitepaper provides a comprehensive overview of the Emirium project, including its structure, token profile, tokenomics, wallet allocations, vesting framework, roadmap, and governance direction.

CORE ATTRIBUTES

Fixed Supply

Total supply permanently fixed at **10,000,000,000 EMI**.

No Mint

No additional tokens can be created.
Supply is immutable.

0% Tax

0% buy tax. 0% sell tax.
Built for fair and open participation.

BscScan Verified

Contract is verified on BscScan
for full transparency.

BNB Smart Chain

Built on the secure, scalable, and
efficient BNB Smart Chain.

Investor-Ready Documentation

Professional, transparent, and
comprehensive project documentation.

Token Structure

On-Chain Profile & Technical Summary

TECHNICAL NOTES

	Token Name:	Emirium
	Symbol:	EMI
	Network:	BNB Smart Chain
	Standard:	BEP-20 / ERC-20 Compatible
	Contract Address:	0x7dedD183214a0597Fe21894DE50B16E1a0f67FdF
	Total Supply:	10,000,000,000 EMI
	Decimals:	18
	Minting:	Disabled
	Tax:	0% Buy / 0% Sell
	Owner Control:	None
	Verification:	BscScan Verified — Exact Match

Fixed Supply

The total supply is permanently fixed at **10,000,000,000 EMI**. No additional tokens can be minted.

Designed for Transparency

Emirium's token structure is built for clarity, fairness, and open participation across the ecosystem.

Public On-Chain Profile

This document reflects the current, verifiable on-chain profile of Emirium (EMI).

EMIRIUM

Wallet Allocation

On-Chain Distribution & Transparency

Emirium is built on transparency and accountability.
The table below details the on-chain allocation of the total supply.

CATEGORY	WALLET ADDRESS	AMOUNT	PURPOSE
 Public Sale	0x3EABcA748A2509dEe3cdaAe42fFA33284BdD41Bc	1,500,000,000 EMI	Reserved for subscription/public sale allocation.
 Liquidity	0x64DbC7dc90B21747e0D6cB48B44cE78941914C8e	1,500,000,000 EMI	Reserved for liquidity and market making.
 Ecosystem	0x038AC8442333f684cb009329458bd514Dd298AC3	2,500,000,000 EMI	Reserved for ecosystem growth and rewards.
 Treasury	0xf72889C3fCDBd185Bc496f6D499B409794a097c	2,000,000,000 EMI	Treasury reserve for long-term project support.
 Vesting Reserve	0x5ad39Bef4dE6b9260015fB7bf4088B6c9a9490F7	2,500,000,000 EMI	Reserve held for time-based beneficiary vesting.

All major allocations are publicly traceable on-chain.
You can verify these addresses and movements using BscScan.

EMIRIUM

Vesting Framework

Long-Term Alignment Structure

Emirium applies a disciplined vesting policy for team, partner, and advisor allocations to support long-term alignment, transparency, and operational stability.

ALLOCATION	PERCENTAGE	AMOUNT (EMI)	VESTING SCHEDULE
 Team	12%	1,200,000,000 EMI	
 Strategic Partners	8%	800,000,000 EMI	
 Advisors	5%	500,000,000 EMI	

Vesting schedules begin at TGE (Token Generation Event).
All allocations are subject to the terms outlined in the official tokenomics and legal documentation.

EMIRIUM

Utility & Ecosystem Direction

Purpose, Participation, and Growth

Ecosystem Incentives

Support community growth and long-term engagement through structured incentives, participation opportunities, and aligned ecosystem rewards.

Liquidity Readiness

Support orderly market preparation and liquidity development to ensure healthy, transparent, and sustainable trading conditions as the project progresses.

Treasury Coordination

Provide structured financial support for long-term project development, operational stability, and strategic initiatives aligned with the project's mission.

Strategic Expansion

Enable partnerships, ecosystem initiatives, and future market expansion to strengthen Emirium's global presence and long-term ecosystem value.

Governance Direction

Support disciplined documentation and structured project decision-making to ensure transparency, accountability, and sustainable governance.

Brand & Community Presence

Support official communication channels and project visibility to strengthen community trust, awareness, and long-term brand credibility.

Emirium's utility framework is designed to grow responsibly as the project advances through documentation, market preparation, and ecosystem expansion — building a transparent, sustainable, and community-driven future.

EMIRIUM

Roadmap

Project Development Path

Emirium (EMI) is being built through a structured, transparent, and phased approach to long-term value creation.

PHASE 1 Foundation

- ✓ Contract deployment
- ✓ BscScan verification
- ✓ Token creation
- ✓ Initial allocation
- ✓ Brand establishment

PHASE 2 Documentation & Official Presence

- ✓ Website launch
- ✓ Token profile
- ✓ Whitepaper
- ✓ Social channels
- ✓ Official project materials

PHASE 3 Market Preparation

- ✓ Audit preparation
- ✓ Liquidity planning
- ✓ Listing-readiness materials
- ✓ Strategic outreach

PHASE 4 Expansion

- ✓ Ecosystem activation
- ✓ Community growth
- ✓ Partnership development
- ✓ Future market expansion

Roadmap timing remains subject to execution readiness, applicable market conditions, and platform requirements.

EMIRIUM

WHITEPAPER

10

Market & Listing Readiness

Audit, Liquidity, and Platform Review Materials

Emirium separates its market-readiness work into dedicated support packages. These packages complement the whitepaper and keep technical, liquidity, and platform review information organized, accurate, and update-ready.

A

Audit Pack

TECHNICAL REVIEW FILE

- Verified contract source, compiler data, deployment records, and BscScan verification.
- Control summary: fixed supply, no mint, 0% tax, no blacklist, no pause, and no owner control.
- Prepared as a separate technical file for independent smart contract audit review.

L

Liquidity Plan

MARKET PREPARATION FILE

- Liquidity allocation reserved for orderly market preparation and trading readiness. Pool structure, pair selection, activation sequence, pricing parameters, and LP policy.
- Final values are confirmed before market activation and recorded in the launch materials.

P

Listing Pack

PLATFORM REVIEW FILE

- Whitepaper, token profile, website, verified BscScan profile, and official channels. Tokenomics, wallet allocation, leadership structure, roadmap, audit status, and liquidity plan.
- Organized for exchange, subscription, and platform-readiness review.
